Question text

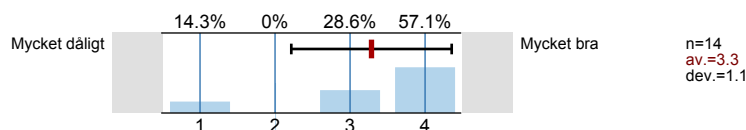

1. Generellt om kursen

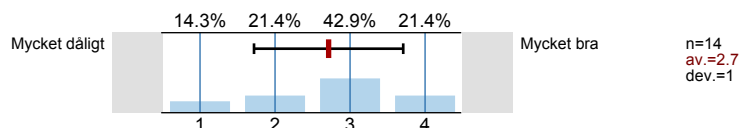

1.1) Är du nöjd med dina egna insatser under kursen?

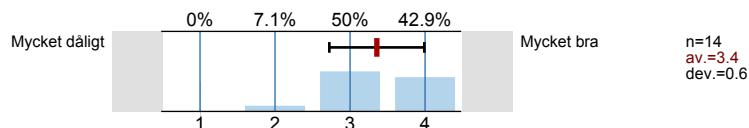

1.2) Vad tycker du om kursens innehåll i sin helhet?

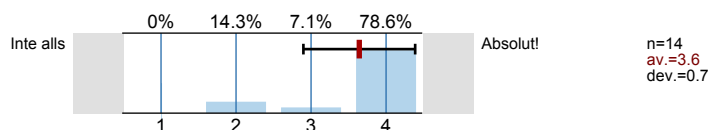

1.3) Vad tycker du om kursens genomförande i sin helhet?

1.4) Hur tycker du att det praktiska vid sidan om undervisningen fungerat (lokaler, IT-resurser, administration o.s.v.)?

1.5) Skulle du rekommendera denna kurs till andra studenter?

1.6) Vad anser du skulle kunna utveckla och förbättra denna kurs?

- 1, Helhets översyn av kursens upplägg i detalj vid första veckan, allt kurs mtrl. kan släppas men forumen öppnas vid aktuell vecka.
- 2, Möjlighet att ladda ned allt kurs mtrl. i en samlad mapp med upplägg/vecka. (.zip fil med mapp struktur?)

Tack för en väldigt informativ kurs,
vänligen
/Adam Östman

- Follow the syllabus lessen work load.like It is difficult to take part in 41 forums for just one course, read 10 books, watch long films, too many videos of same messages. Goran wall Exergy and his unsatisfiable replies his instructions like a.s.a.p time flies must be done this Friday, this week that week before and after that not this not that It stresses student while there is also other parallel courses for student to study. Please try to make it simple for student to work with.

- Genom en bättre struktur får en start och ett mer konkreta mål som man kunde följa genom kursen.

- I am glad that ,i got new insight on the concept of Exergy and sustainability in energy. It is most important in today's economy .

- I feel it will be better if we can the communicational way like google wave
- I would like to have a earlier starting date for the final project assignment. If we where to chose our subject in an early stage I think people would have started earlier and there would have been more time for evaluation in the end, I think the evaluation part was really good.
- In my own Outlook,I think to improve this course, the Chat room platform should be actively functional to grant easy communication between participants and the teacher.
And also to improve this course there should be on some occasions, live Lecture by the teacher may be presented via Adobe Connect because to me the way everything goes in the course makes me to place my observation that "the course is more-of selves study".
But i must say that everything went well as planned and I personally learn a whole lot things like:"Exergy a useful Concept"
Thanks Goran Wall for the great effort you added to be able to carry us all along in this course.

Regards
\Elochukwu

- Lite mer feedback från läraren genom kommentarer för att få lite input och kanske nya idéer, om man är fel ute.
Upplägget var intressant med mycket ansvar på studenten och man fick tänka själv, inte bara bli matad med information och svara på frågor. Det var en utvecklande kurs.
- More Interaction with the teacher and with other students through group work for example.
- too many repetitions of similar subjects. Boring to read so many rapports and books..focus on exergy is exaggerated.. did not like the litterature..so many seminarium videos are unneeded..forum discussions are totally meaningless
